Event/Social Meetup Management App

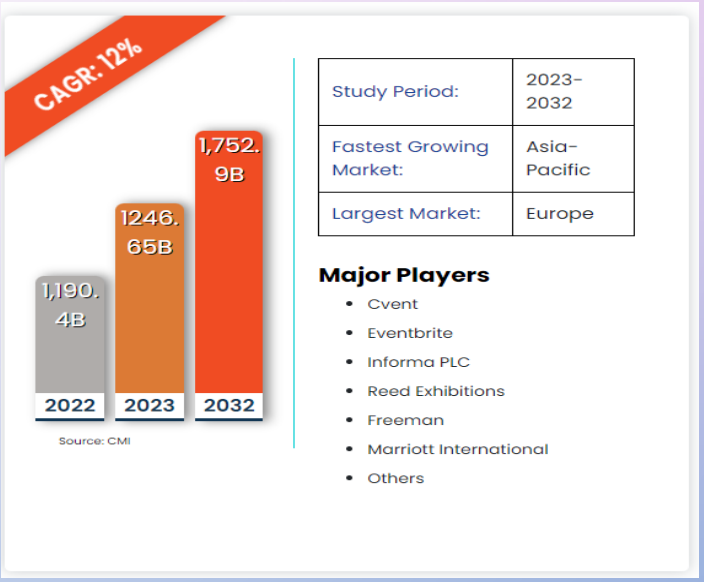

Industry Analysis

The events industry market serves as a platform for individuals, organizations, and businesses to host events that bring people together for various purposes, such as networking, knowledge sharing, entertainment, celebration, product launches, and business transactions.

The most popular events include conference & exhibition, corporate events & seminar, promotion & fundraising, music & art performance, sports, festival, trade shows, and product launch.

The Global Events industry market is expected to record a CAGR of 12% from 2023 to 2032. In 2023, the market size is projected to reach a valuation of USD 1,246.65 billion. By 2032, the valuation is anticipated to reach USD 1,752.9 billion.

Growth Factors

- Desire to connect with Like minded folks
- Collaborate with people on different activities
- Increasing Demand for Experiential Events
- Business Networking and Collaboration Opportunities
- Rise in Corporate Events and Conferences
- Increased Focus on Personalization
- Growth in Tourism and Destination Events
- Impact of Social Media and Influencer Marketing
- Demand for Entertainment and Live Performances

Problem Statement

Problem Research

Basis research from interviewing people, survey questionnaire and taking feedback by myself attending few social events from current apps in the market, below pain points were gathered:

- People wish to connect/collaborate with like minded people, expand their network beyond work domain
- Current platforms in the market have not been effective in solving the problem.
    - Lot of issues for Organizers as they don't have much options/features to get relevant/authentic people into their events. Also, they have faced a lot of issues in canceling their paid membership
    - Lack of customer support
    - No marketing or promotion of the platform
    - Not much segregation for relevant groups/members/organizers
    - Not used extensively in India as there are few offline events listed on the platform.

Google doc form link

Problem Definition

Need for a digital platform which can –

- facilitate in meeting new people and collaborate with groups and friends based on network of interests, from tech conferences to free yoga and everything in-between
- Help people expand their network beyond work domain and attend local events around the city. This need has increased post covid and especially for folks who migrate to a different city due to work

Note: Platforms like Meetup, Eventbrite are not used extensively in India as there are hardly any offline events. Book My Show is used widely PAN India but it has mostly paid events.

Competitive Benchmarking

Data Points/Factors	Meet Up	Eventbrite	BookMy Show
Platform description	Meetup/Event platform to socialize and create events across diverse categories. Same app for Organizers and Attendees	Event Management and Ticketing platform to conduct events	Leading event, movie/concert ticket booking platform with PAN India partnerships
Platform Features	Event Creation/RSVP, Minimalistic and Intuitive UI, Chat and comments thread for attendees to clear out queries	Event creation/RSVP, Follow events/organizers customization options, Event notifications	User-friendly interface and multiple payment options, Mostly paid events
Competitive Advantage	Still one of the most prominent platforms to create casual events/meetups	Focus on variety of events, Follow options to get relevant recommendations/notifications, event management tools	Brand presence, Extensive network of partnerships
Target Audience	Diverse target audience including Organizers, attendees from all age groups. Events of all varieties and expanding across various domains are available on the app	All age groups	All age groups. Mainly used by audience to attend movies/concerts
Strength	Proper event categorization, Intuitive UI, Personalized event recommendations, Global presence	User-friendly event management tools, personalized recommendations, growing popularity	Reliable ticket availability, Market presence, PAN India partnerships
Weakness	Not extensively used in India, Poor marketing and customer support, Some organizers have felt duped post purchase of paid subscription, No authentic way to filter out fake attendees.	No specific categorization of Events, Less number of offline events, Poor customer support	Potential competition from emerging platforms. Mainly used for specific segment like movies/standup show bookings. Still not used as an overall event booking platform

Solution ~ Social 19

A platform where you can :-

- Easily meet people you know you'll get along with and create groups of friends that will be as excited as you to embrace your hobbies, participate in online or local events or engage in discussions.
- Explore online or local events by category, search by keyword, or see what's popular in your area with a map
- Meet new people and collaborate with groups and friends based on your network of interests, from tech conferences to free yoga and everything in-between
- Save events you're interested in and come back to them later. Pick and choose the people and friends you want to meet at all the events that you like
- Have discussions with the people you meet and use direct messaging to stay in touch with your new friends
- Meet people who are interested in the same local or online events, create new groups of friends and expand your online network
- Business Networking and Collaboration Opportunities
- Create offline community for anything and everything

Start a group :-

- Host your own events online and in person by creating a group on your favorite topic, and meet new people
- Watch your community of friends and network of people grow as your group is recommended to interested people
- Easily personalize and schedule events on-the-go, and manage your group from anywhere
- Keep the momentum going between events by sharing photos and using discussions and instant messaging to connect with the people and friends in your group

Communities :-

- Hobby wise communities to connect/collaborate for:
  Musicians | Runners | Sports people | Food bloggers | PMs | Marketers | Entrepreneurs/CEOs | Party people | Yoga/Meditation | Travelers | Bikers | Lawyers | Educators | NRIs | Immigrants
- Single parents' community to meet/interact with people
- Open Mic Events etc.

P.S: The entire idea is based on how people had felt isolated especially, during and after Covid 19

Organizer's Persona

Name : Sneha Kapoor
Age : 32
Occupation : Marketing Manager
Location : Mumbai, India
Background : Sneha is a highly organized and ambitious professional who frequently organizes industry-related events and networking opportunities. She understands the value of connecting with like-minded professionals and wants to create a platform where people can come together to learn, network, and share their knowledge.

Image Source: https://www.brightscout.com/insight/your-guide-to-building-a-user-persona

Goals and Behaviors:

- Sneha wants to create engaging and informative events for professionals in metro cities like Mumbai, Delhi, and Bangalore.
- She wants to attract a diverse audience by offering a wide range of event topics, from technology and business to arts and culture.
- Sneha seeks to maximize event attendance, ensure a smooth RSVP process for attendees and wants to track event metrics to receive feedback for continuous improvement
- Sneha desires a user-friendly platform that allows her to create, manage, and promote events effortlessly

Challenges:

- Balancing her busy work schedule with event planning and coordination.
- Attracting and retaining attendees in a competitive market with numerous event options.
- Lot of issues for Organizers in current products as organizers don't have much options/features to get relevant/authentic people into their events. Also, they have faced a lot of issues in canceling their paid membership and experienced poor customer support
- No marketing or promotion of the app platform

Attendee's Persona

Name : Rajesh Sharma
Age : 28
Occupation : Software Engineer
Location : Delhi, India
Background : Rajesh is an avid learner and enjoys attending events to expand his professional network and gain knowledge in his field. He is always on the lookout for interesting and valuable events happening in his city.

Image Source: https://medium.com/ignation/your-guide-to-successful-persona-building-f3dae3f4762d

Goals and Behaviors:

- Rajesh wants to discover a variety of events happening in Delhi and other metro cities, covering topics like technology, entrepreneurship, and personal development.
- He prefers events with detailed descriptions, including key takeaways and speaker information.
- He values user-friendly RSVP options, including the ability to register and pay online.
- He wants to connect with fellow attendees and potentially network with professionals in his industry.
- Rajesh appreciates a rating and review system to make informed decisions about attending events.

Challenges:

- Finding relevant events amidst a vast number of options in metro cities.
- Dealing with conflicting schedules and time constraints.
- Not much segregation for relevant groups/members/organizers in current available platforms in market. Additionally, no actions taken if someone faces any harassment/abuse
- Ensuring the event venue is easily accessible and convenient to reach.

Product RoadMap (Phase wise Plan)

Phase 1: MVP

1. User Registration and Authentication:

1. User account creation with basic
2. Login functionality for organizers/attendees

2. Organizer Features:

1. Groups/Events Creation: Organizers can create groups and events by providing details such as title, description, date, time, duration, venue, and RSVP option.
2. Event Management: Organizers can view, edit, delete their created events and categorize them properly.
3. Basic Event Listing: Display a list of upcoming events with essential details.

3. Attendee Features:

1. Event Discovery: Attendees can browse for events based on categories, location, and date.
2. Event Details: Attendees can view event details, including description, date, time, venue, and RSVP option.
3. RSVP Functionality: Attendees can RSVP for events they plan to attend.
4. User Profiles: Attendees can create and manage their profiles, including basic information and interests.

Phase 2: Enhancements and Scaling

1. Advanced Event Management for Organizers:

1. Ticketing and Payments: Organizers can set ticket prices, manage ticket inventory, & integrate payment gateways for ticket sales.
2. Advanced Event Listing: Enable sorting, filtering, and advanced search options for event discovery.
3. Event Promotion: Allow organizers to promote events through featured listings & sponsored placements.

2. Attendee Enhancements:

1. Attendee Networking: Enable attendees to connect & communicate with each other before, during, & after events.
2. Attendee Ratings/Reviews: Introduce a rating/review system to help attendees make informed decisions about attending events.

3. Notifications:

1. Push notifications for event updates & reminders.

4. Analytics and Insights:

1. Event Analytics: Provide organizers with data and insights on event performance, attendee demographics, and engagement metrics.
2. User Analytics: Track user activity, preferences, and interests to personalize event recommendations.

5. Scalability and Infrastructure:

1. Performance Optimization: Improve app. performance, load time, and scalability to handle increased user traffic and data.
2. Infrastructure Scaling: Implement necessary infrastructure/server architecture to support growing user base and event listings.

Phase 3: Advanced Features and Expansion

1. Community Building:

1. Organized Communities: Allow users to create and join communities focused on specific interests or industries.
2. Community Events: Enable community leaders to organize events exclusively for their community members.

2. Integration and Partnerships:

1. Calendar Integration: Sync events with users' calendars, allowing them to easily manage their schedule.
2. Integration with External Services: Integrate with third-party services such as mapping/navigation, ticketing platforms, or social media platforms for enhanced functionality.

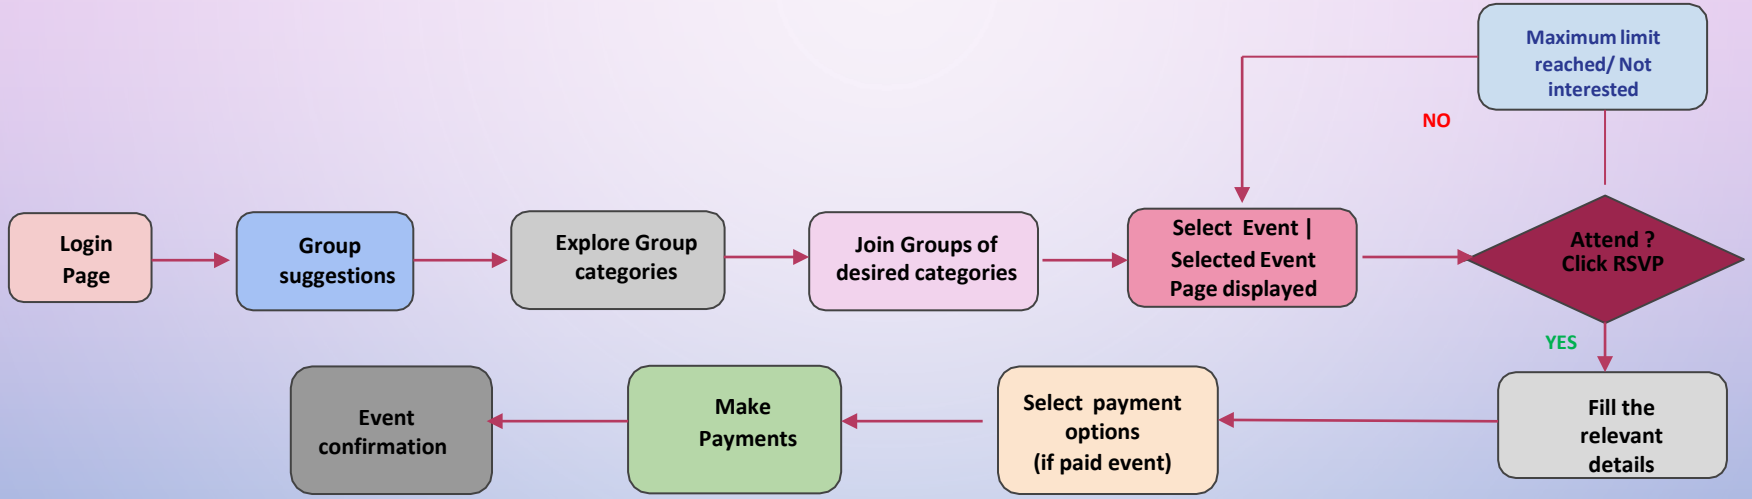

3. Regional Expansion:

1. Expand to additional cities, starting with tier 1/tier 2 metro cities.
2. Localize the app. to support multiple languages/regional preferences.

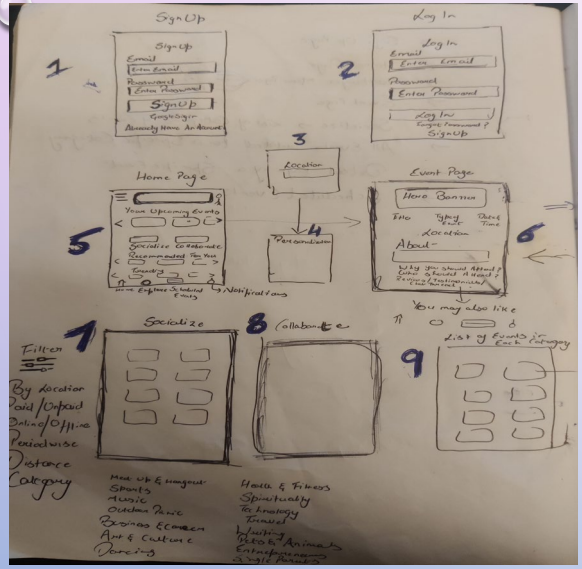

4. Website:

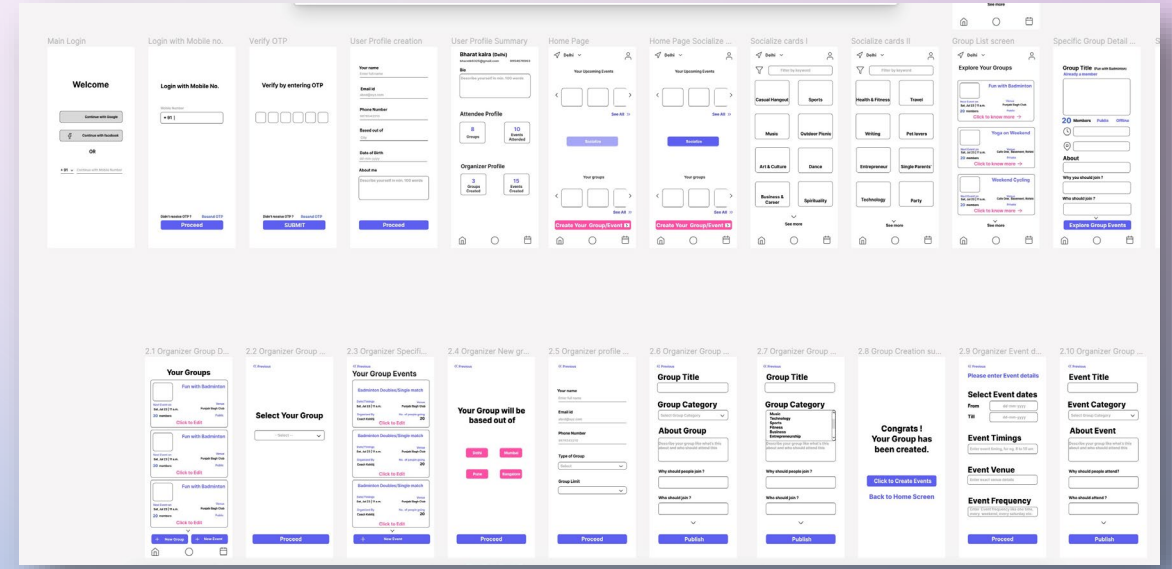

1. Develop a website for the same
